6.4—VOLUNTEERS

Enlisting the support of volunteers is a way in which the District can expand the scope of resources and knowledge available to enrich the students’ educational experiences while strengthening the relationship between the school and the community. Volunteers can also perform non-instructional tasks that allow certified personnel more time to devote to instruction.

The District shall establish guidelines to ensure volunteers are aware of pertinent District policies and rules. Volunteers who violate school policies or rules, or knowingly allow students to violate school rules, may be asked to leave the school campus.
